PAMPetrol

Energía y Minería
SECRETARÍA

LA PAMPA
Gobierno en Acción

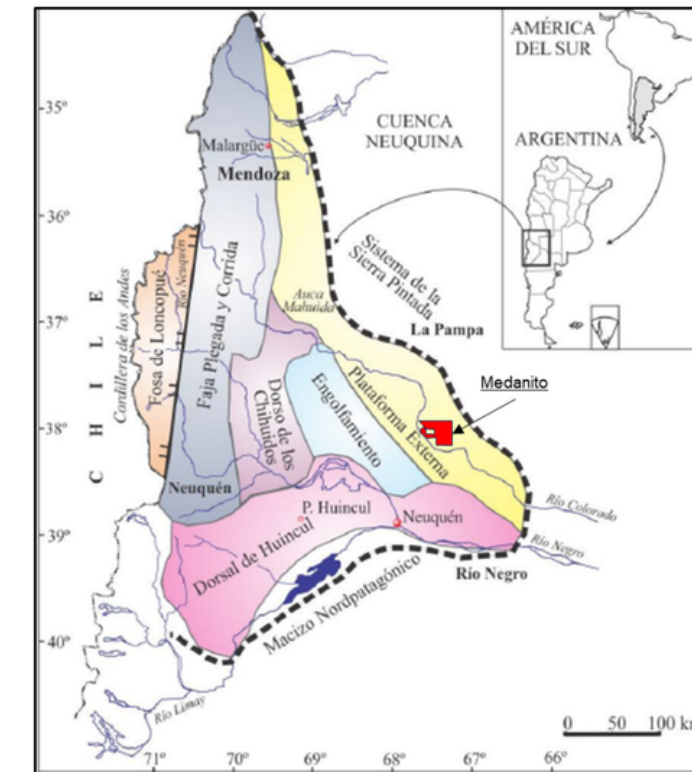

LONG-TERM HYDROCARBON INVESTMENT OPPORTUNITY

A hydrocarbon development opportunity with strong production potential to operate the Province of La Pampa's most significant concession, offering a 25-year growth horizon.

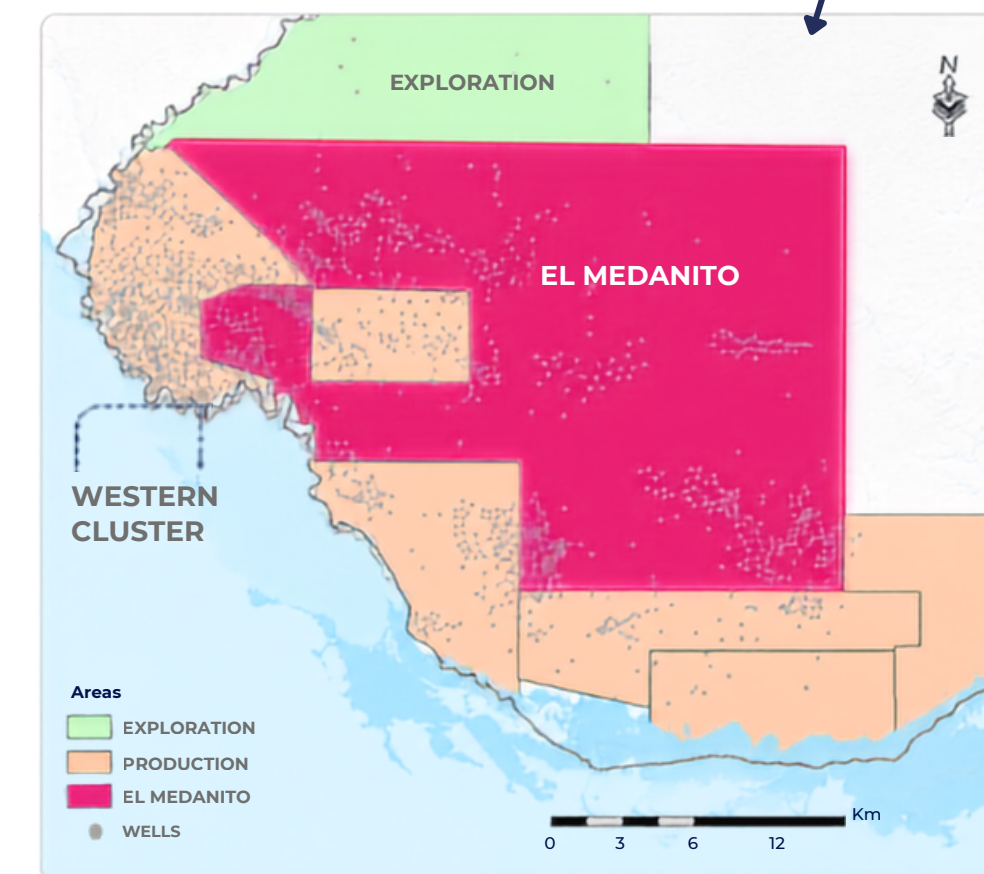

The Province stands out for its sound fiscal management: it has the second-lowest public debt per capita in Argentina and no outstanding debt maturities, providing a uniquely stable financial environment in the country.

A STRATEGIC GATEWAY TO PATAGONIA'S ENERGY HUB

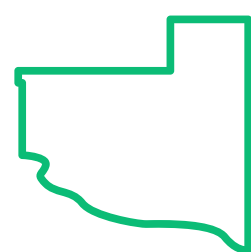

The El Medanito area is strategically located in southwestern La Pampa, serving as the natural gateway to the Neuquén Basin and Vaca Muerta. The block offers outstanding logistics and close proximity to the country's main hydrocarbon hubs, located just 30 km from the city of 25 de Mayo and directly connected to OLDELVAL's export terminal in Catriel. This ensures immediate access to contractors, operational synergies, and efficient transportation infrastructure for an asset already in full production.

La Pampa

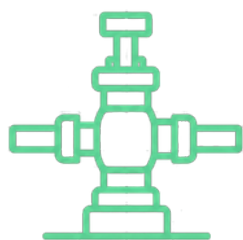

EL MEDANITO: A KEY PROVINCIAL ASSET

834 km²
Surface area

487
wells drilled

315
active wells

DAILY PRODUCTION — MARCH 2026

OIL
487 m³/d
3.062 bbl/d

LIQUID
1.581 m³/d
9.943 Mbbbl/d

GAS
232 Mm³/d
8.197 Mcf/d

KEY INVESTMENT HIGHLIGHTS

25-year

Concession Term

80/20

Successful Bidder / Pampetrol SAPEM

INVESTMENT FRAMEWORK

ROYALTY RATE

15 % + X% (X > = -5%)

AREA ENTRY BONUS

25 MMU\$S + X (X > = -5 MM U\$S)

INVESTMENT PLAN AND MINIMUM WORK PROGRAM

firm wells during the first 10 years.

firm workovers during the first 3 years.

injection pilots.

BENEFITS OF INVESTING IN LA PAMPA

Oil and Gas Potential and Institutional Framework

Why choosing La Pampa

Established Western Cluster with proven operational experience.

Portfolio with oil and gas production and strong operational continuity.

Institutional framework

Provincial administration hydrocarbon under Provincial Law No. 2675.

Investment and promotion process designed to support the development of the asset.

Why choosing El Medanito

Producing field with primary production.

30.3% of the Province's oil production.

56.6% of its natural gas production.
